

## Sahnoun Mohamed Ali

Software engineering student  
web developer

+216 94723063

dalissj1@gmial.com

jardin d'el mezah, ariana

## Skills

C/C++  
java

## Web skills

html/css/javascript  
Sass  
MERN Stack  
(MongoDB/Express/React/Nodejs)  
Mongoose js  
MySQL

## Hobbies

Sports  
(Socceer/ Basketball)  
Video games

**Enthusiastic Software engineering student** eager to contribute to team success through diligence, attention to the slightest details and above average organizational skills. Clear understanding of modern technologies and frameworks. Motivated to learn, prosper and excel in the computer science industry.

## Education

- Ennasr High School , Ariana, 2015-2019 (Baccalaureate degree with a Mathematics' specialization, 16.51 GPA(/20)).
- Software Engineering National institute of Applied Science and Technology -INSAT(2019-2024).

## Projects

### Black Jack (Javascript, HTML, CSS) game, 2019:

- Basic javascript DOM manipulations.

### keeper app (MERN Stack), 2021:

- Designed and implemented the website's UI using REACT, MATERIAL-UI and Sass.
- Used axios to link the back-end and the front-end.
- Created the server's routes with Express and affected the changes to the database using Mongoose.

### NewsLetter (Express js), 2021:

- UI created with Html, CSS and vanilla Javascript.
- Required the body-parser library to get the value of the input value once the form is submitted.
- Posts the input data to the mailchimp api.

### To do list (Express, MongoDB), 2021:

- UI created with Html, CSS and vanilla Javascript.
- Created multiple routes for the usage of multiple lists (if the list name does not already exist in the database a new empty list is created with its name).
- You can add, check and remove todos.

### My Portoflio(Express, React), 2021:

- made use of a react-spring hook (useTransition) to make images switch animation.
- installed and implemented nodemailer in the backend to send the form posts to my personal e-mail.
